| Team ID       | SWTID-2026-1307                                                     |
| Project Name  | Script-Controlled ACL – Restrict Record Access Based on Field Value |
| Maximum Marks | 3 Marks                                                             |

### Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

#### Example:

| <b>Problem Statement (PS)</b> | <b>I am (Customer)</b> | <b>I'm trying to</b>                       | <b>But</b>                                 | <b>Because</b>                    | <b>Which makes me feel</b>           |
|-------------------------------|------------------------|--------------------------------------------|--------------------------------------------|-----------------------------------|--------------------------------------|
| PS-1                          | An HR Manager.         | Restrict confidential employee records     | All employees can see confidential field   | No field-based ACL is configured  | Insecure and worried about data leak |
| PS-2                          | An IT Security Admin   | Control access based on region field value | Control access based on region field value | ACL is not checking field value   | Frustrated                           |
| PS-3                          | A Finance Lead         | Restrict salary records access             | Non-finance users can view salary field    | Script-based condition is missing | Concerned                            |
