

Code-Layout, Readability and Reusability

Date	30 September 2026
Team ID	SWTID-2026-1307
Project Name	Script-Controlled ACL-Restrict Record Access Based on Field Value.
Maximum Marks	5 Marks

Code-Layout, Readability and Reusability:

This document evaluates the quality of the codebase in terms of its structure, readability, and reusability. Well-organized code with proper naming conventions, comments, and modular design ensures that the project is maintainable and can be extended or reused in future development.

Code Layout Checklist:

S.No	Code Quality Parameter	Description Followed (Yes / No / Partial)	Remarks
1	Consistent Indentation	Yes	Uniform spacing/tabs used throughout the code
2	Proper File Structure	Yes	Files and folders are logically organized
3	Variable Name	Yes	their purpose clearly
4	Function / Method Names	Yes	Functions are descriptively named
5	Code Comments	Yes	Inline and block comments explain logic
6	Modular Design	Yes	Code is split into reusable functions/modules Duplicate or unused code is removed
7	No Redundant Code		
8	Error Handling	Yes	Exceptions and errors are handled gracefully

Reusable Components / Modules:

S.No	Component / Module Name	Language / Technology	Where we used	Reusability Level (High / Medium / Low)
1	Access Control Script Include	JavaScript / ServiceNow	To check field value condition for ACL	High

2	Field Validation Utility	JavaScript	Validates confidential field value before restricting	High
3	Role Verification Module	JavaScript / Glide API	Checks if user has HR Manager role	Medium
4	ACL Condition Script	ServiceNow Scripted ACL	Applied to HR table to restrict record access	High
5	Error Handling Module	JavaScript	Handles exceptions gracefully in ACL script	Medium

Overall Code Quality Assessment:

Aspect	Rating (1-5)	Comments
Code Layout & Structure	5	Well-structured with proper file organization and consistent indentation
Readability	5	Clear variable names, descriptive functions, easy to understand
Reusability	5	Script Includes are highly reusable across multiple ACLs and tables
Documentation / Comments	5	Proper inline and block comments explain ACL logic clearly
Overall Score	5	High quality, secure and maintainable code following best practices
