

Project Demo Planning

Date	30 September 2026
Team ID	SWTID-2026-1307
Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Explain why some records (Priority 1 - Critical incidents) must be hidden from normal users and the need for field-based access control.	2	Bharathi
2	Solution Overview	Show the architecture: user request, ACL engine, script check of field value and role, then access granted or denied.	2	Bharathi
3	Roles, Users & Sample Data	Show the incident_manager role, the two test users (Manager User and Normal User) and the sample incidents with different priorities.	2	Bharathi
4	Live Demo: Script-Controlled ACL	Open the Read ACL on the Incident table, explain the script, then impersonate Normal User and show Priority 1 records hidden.	3	Bharathi
5	Live Demo: Manager & Direct Access	Impersonate Manager User to show all records visible, then test the direct URL of a restricted record as Normal User.	2	Bharathi
6	Deployment & Conclusion	Show the completed Update Set export, summarize results and future enhancements.	1	Bharathi

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Introduce the project and the problem of unrestricted record access.
2	Solution Overview	Explain the ACL and script logic using the architecture diagram.
3	Live Feature Demonstration	Demo on the ServiceNow instance: normal user, manager user and direct URL tests.
4	Q&A Session	Answer questions about the ACL script, roles and Update Set deployment.
